

Medication Refill Policy

The following demonstrates the policy and procedures necessary to refill a patient's medication(s) according to the standard operating procedure for our practice.

Policy

We ask our patients to monitor their prescription medication closely, and to assess refill requirements before each office visit.

We request that patients get their medications refilled at the time of their appointments or, when necessary, to call a prescription in to their pharmacy several days in advance of running out of medication. We will review and respond to all medication refill requests **within 3 business days**. However, certain classes of medications, such as pain medicines, may require a visit to the office with one of our physicians.

At the time of each visit please remind us of your refill requests.

To expedite your refills, we encourage you to contact your pharmacy in order to receive the medications electronically and to avoid unnecessary phone calls to our office.

Please note that certain medications require routine blood tests and our physicians will review the blood tests prior to any refills. We highly recommend that you complete the tests if they were required by our physicians.

The refill for certain medications, including pain medications, will require routine follow up visits and request maybe denied by our physicians if you have not been seen in our office recently.
